PROFESSIONAL SUMMARY

Results-driven **AI Automation Engineer & Full-Stack Developer** delivering production-grade AI pipelines, CRM automation systems, and scalable MERN web applications for clients across Canada and globally. Expert at integrating LLMs, Voice AI, REST APIs, and distributed webhook architectures to eliminate operational overhead and accelerate measurable business growth. Targeting high-impact engineering roles at global software houses and product-driven startups.

EXPERIENCE

AI Developer Jan 2026 – Present
[DBTronics.org](#) | [Canada](#) — [Remote](#)

Architected end-to-end AI automation pipelines via **N8N, Vapi, and GoHighLevel CRM**, automating **100%** of inbound call handling, lead capture, and CRM synchronization — eliminating manual staffing overhead for routine client operations.

Engineered a Voice AI receptionist with natural-language call routing and live GHL CRM sync via webhook triggers, reducing staffing costs by an estimated **60%** and scaling client acquisition with zero additional headcount.

Full-Stack Web Developer 2025
[Cogxioms](#) | [Pakistan](#)

Developed the company flagship website on the **MERN stack**, engineering a responsive React.js frontend with an Express.js/MongoDB backend achieving sub-200ms average API response times.

Optimized the full-stack integration and deployment pipeline, enabling seamless cross-device rendering and high-availability operations across all business-critical workflows.

PROJECTS

AegisCare – Intelligent Multi-Agent Elderly Care Framework | *MERN Stack, Multi-Agent Systems, Real-Time Alerts, REST APIs*

Engineered a **multi-agent MERN platform** monitoring patient vital signs in real time and dispatching caregiver alerts with **sub-second latency**; designed secure REST APIs and an analytics dashboard enabling data-driven patient monitoring at scale.

AI Inbound Receptionist Automation System | *Vapi, N8N, GoHighLevel CRM, Voice AI*

Built a production Voice AI receptionist using **Vapi** for natural-language call handling, appointment scheduling, and live GHL CRM sync via N8N — automating **100%** of routine inbound calls and eliminating staffing overhead entirely.

Cogxioms – Corporate MERN Stack Website | *React.js, Node.js, Express.js, MongoDB*

Delivered a scalable, high-performance MERN corporate website with modern responsive UI and an optimized backend, supporting all business-critical operations from day one of deployment.

Telegram Automation Bot | *Python, Selenium, Playwright, Web Scraping*

Developed high-volume Telegram bots via **Selenium & Playwright** for automated data extraction, real-time content updates, and scheduled delivery pipelines — processing thousands of records per session at scale.

AI Chatbot Automation System | *N8N, Webhooks, Conversational AI, LangChain*

Deployed an **N8N-powered conversational AI system** automating customer query resolution, lead qualification, and cross-platform CRM sync via webhook triggers — reducing manual response overhead by **80%**.

EDUCATION

BS Computer Science 2022 – 2026
[FAST – National University of Computer & Emerging Sciences](#)

A Levels 2019 – 2021

TECHNICAL SKILLS

Languages & Frameworks: Python (Selenium, Playwright), JavaScript (React.js, Node.js, Express.js), C++, MongoDB

AI & Automation: N8N, Vapi, GoHighLevel (GHL) CRM, LangChain, OpenAI APIs, Conversational AI, Multi-Agent Systems

Backend & Systems: REST API Design, Webhook Integrations, Distributed Systems, CRM Automation, Scalable Architecture

Tools & Platforms: Git/GitHub, VS Code, Postman, WordPress

LEADERSHIP & ACTIVITIES

FAST Sports Guild Society – Logistics & Scheduling Lead 2022 – Present

Managed end-to-end scheduling and logistics for **4+ inter-university sports leagues**, including DAIRA events and Hostel leagues, coordinating **500+** participants across seamless multi-day operations.

Daira Marketing Team – FAST NUCES 2023

Executed targeted outreach campaigns for DAIRA 2023, driving an event attended by **500+ students across 10+ universities** — delivering cross-campus brand visibility and engagement at scale.
